Professional Summary

Dynamic BBIT professional and Information Systems Administrator with a specialization in AI integration and Data Analytics. Currently driving digital transformation at CPF Financial Services by developing AI powered solutions and interactive data dashboards. Proven track record in full-stack development (MERN), network infrastructure and web administration. Adept at bridging the gap between complex technical systems and user centric business solutions to optimize organizational efficiency.

Experience

Attachment - May 2023 – August 2023

*Department of Finance, Economic Planning, and ICT (E-Government Services),
Kisumu County*

Supported and maintained network infrastructure, including configuring and troubleshooting routers, switches, and access points to ensure reliable connectivity.

- Delivered end-user support, resolving hardware, software, and network issues for government staff.
- Operated help desk systems, resolving technical inquiries efficiently and documenting resolutions for continuous improvement.
- Worked closely with senior staff to document and streamline IT processes, enhancing system efficiency.
- Prepared technical reports on system performance, troubleshooting activities, and improvement recommendations.

Web Administrator (Remote) - April 2024 - present

Dr.Kennedy Hongo Foundation

- Lead the end-to-end management of the foundation's web presence, ensuring 99.9% uptime through proactive server monitoring and backup protocols.

- Designed and deployed responsive UI/UX enhancements to improve donor engagement and site accessibility.
- Hardened site security by implementing SSL certifications, firewall configurations and regular vulnerability assessments.
- Optimized website performance and SEO, resulting in improved visibility for foundation initiatives.

Information Systems Admin- *June 2025 - present*

CPF Financial Services, Nairobi County

- **AI & Data Analytics:** Actively contribute to the development of AI solutions within the Data Analytics division, focusing on automating manual workflows and enhancing predictive capabilities.
- **Business Intelligence:** Design and implement interactive data dashboards that provide executive leadership with real time insights into organizational KPIs.
- **Systems Optimization:** Manage and maintain critical hardware and software infrastructure, ensuring seamless system updates and zero latency end-user support.
- **Security & Compliance:** Execute robust security measures to protect sensitive financial data, aligning with industry standards and data protection regulations.

Research work

Book Recommendation System – Final Year Project

Kabarak University | September 2023 – March

I developed a personalized book recommendation system by leveraging machine learning and natural language processing (NLP) techniques. This involved implementing both collaborative and content-based filtering methods to provide tailored book suggestions for users.

The project included processing and analyzing extensive datasets comprising book metadata and user interaction patterns, optimizing the system's performance for a diverse range of readers. To enhance user experience, I created an intuitive and user-friendly interface for seamless interaction and engagement with the recommendations.

Critical Skills & Knowledge

- **Networking Infrastructure Support:** Skilled in maintaining and troubleshooting network devices and access points ensuring seamless connectivity.
- **AI:** Proficient in developing and integrating AI solutions, with a focus on Machine Learning and NLP to drive automation. I specialize in building interactive data dashboards that translate complex analysis models into actionable business insights. My experience includes deploying recommendation engines and creating AI driven tools that enhance user engagement and operational efficiency within the Data Analytics division.
- **Programming:** Proficient in JavaScript, SQL and Python. My proficiency in Javascript enabled me to specialize in MERN. (MongoDb, Express, React and Node.js)
- **Database Management:** Expert in designing database schemas and managing data across both relational (SQL) and non-relational (NoSQL) systems. I am particularly skilled in MongoDB for scalable MERN stack applications and SQL for complex data manipulation. My focus is on maintaining high data integrity, optimizing query performance, and implementing robust backup and security measures for enterprise systems.
- **IT Support/End-User Support:** Troubleshooting hardware, software, and networks. Experienced in diagnosing and resolving technical issues for users, providing clear communication and efficient solutions.
- **Web Administration:** Supported the management and maintenance of websites, ensuring content updates and site functionality.
- **Help Desk Operations:** Proficient in using ticketing systems to manage and resolve IT support requests, enhancing service delivery.
- **Reporting Techniques:** Prepared and documented detailed reports on system performance, incident management, and technical processes.
- **Technical Tools:** Familiarity with IoT systems and basic hardware setup.
- **Graphic Designing:** Experience designing game posters for Kabarak Rugby Team, brochures, and posters for part-time ventures.

Academic Qualifications

Bachelor of Business Information Technology (B.B.I.T.) – DEGREE

Kabarak University, Nakuru | 2020 – 2024

Kenya Certificate of Secondary Education (KCSE)

Maseno School, Kisumu | 2019

Kenya Certificate of Primary Education (KCPE)

CITAM Academy, Kisumu | 2015

Professional Courses

- Cisco CCNA 1, 2, and 3
 - Cisco Introduction to Cybersecurity
 - Cisco Computer Hardware Basics (Badge)
 - Cisco Introduction to IoT (Badge)
 - Cisco Introduction to Modern AI
 - IBM AI Fundamentals
-

Leadership Skills

Rugby Captain

Kabarak University, Kenya | 2023 – 2024 Season

- As Rugby Captain at Kabarak University, I managed team operations, coordinated high pressure training schedules and fostered a culture of discipline and teamwork. This role sharpened my ability to mentor peers, manage logistics and lead diverse groups toward collective goals. Skills I now apply in coordinating technical projects and cross functional team collaborations.
-

Awards

Best overall student for KCPE at CITAM Kisumu for the year under examination

Hobbies and Interests

- **Sports: Active Rugby Player;** committed to physical fitness and maintaining the discipline and teamwork required in competitive sports.
- **Cybersecurity Research:** Actively exploring emerging threat vectors and defense mechanisms to stay ahead of system vulnerabilities.
- **Continuous Learning:** Keeping pace with the evolving technology landscape and open source contributions.
- **Creative Design:** Freelance graphic design for promotional branding and digital media.

Languages

- **English:** Fluent -written and spoken
- **Swahili:** Fluent – written and spoken
