Professional Summary

Results driven ICT and AI professional with hands on experience deploying data analytics, AI powered tools and digital platforms across financial services and public sector environments. Committed to leveraging technology as a force for financial inclusion and digital transformation. Brings demonstrated ability to build KPI dashboards, automate workflows with machine learning, administer digital financial platforms under SLA frameworks and bridge technical implementation with operational needs.

Professional Experience

Information Systems Administrator-ICT Operations & Digital Platforms

CPF Financial Services, Nairobi County | June 2025 - present

- Support enterprise ICT operations and digital financial platforms across lending and payment systems, contributing to 99.9%+ service continuity within structured SLA frameworks and fast paced operational demands.
- Design and maintain interactive executive KPI dashboards that translate operational data into actionable insight for senior decision makers, strengthening analytical reporting and reducing manual reporting cycles.
- Contribute to AI and predictive analytics initiatives within the Data Analytics division, applying problem solving skills to automate manual workflows and improve data driven decision support for financial operations.
- Coordinate troubleshooting and escalation across cross functional teams including customer experience, operations and subsidiary stakeholders, building communication and stakeholder management skills relevant to enterprise banking environments.
- Produce technical documentation and operational reporting that improve knowledge transfer, attention to detail and process efficiency across enterprise support operations.
- Ensure data handling aligns with internal data protection standards, contributing to responsible and compliant digital operations within a regulated financial environment.

Web Administrator (Remote)

Dr.Kennedy Hongo Foundation | April 2024 – March 2025

- Manage the organization's web infrastructure and online presence through proactive monitoring, backup management and performance optimization.
- Designed and implemented responsive UI/UX improvements that enhanced accessibility, usability and donor engagement.
- Strengthened website security through SSL implementation, firewall configuration and periodic vulnerability assessments.
- Improved website visibility and performance through SEO optimization and technical performance enhancements.

ICT Attachment

Department of Finance, Economic Planning, and ICT (E-Government Services), Kisumu County | May 2023 – August 2023

- Supported maintenance and troubleshooting of network infrastructure including routers, switches and wireless access points.
- Delivered end user ICT support by resolving hardware, software and connectivity issues for government staff.
- Assisted in help desk operations, ticket resolution, technical documentation and issue escalation processes.
- Contributed to ICT process documentation and reporting to support operational efficiency improvements.
- Prepared technical reports on system performance, troubleshooting activities and operational recommendations.

AI, Data & Digital Projects

AI Powered Book Recommendation System – Final Year Project

Kabarak University | September 2023 – March

- Developed a machine learning-based recommendation system using collaborative filtering and content based filtering approaches to deliver personalized book recommendations.
- Applied Natural Language Processing (NLP) techniques to analyze book metadata and user interaction patterns.
- Processed and analyzed large datasets to improve recommendation accuracy and user relevance.
- Designed and developed a user friendly interface to improve accessibility and user engagement.
- Utilized Python, machine learning concepts and database technologies to support model development and application functionality.
